CUSTOMER EXPERIENCE

Brads is the most modern and qualified "full service" insurance repair business in our Nelson region. We constantly update our plant and staff knowledge in order to deliver not only the best possible repair service but also customer service. Our work is consistently of a high standard, we employ skilled staff, we are customer service focused and we also have sound business practices.

Brad is in the workshop every day and enjoys working on vehicles alongside our team of tradesmen. We are a local business enjoying phenomenal growth and this year we are looking forward to building on our existing structural repair centre success further.

With a fleet of courtesy cars and free pick up and delivery we are able to get our customers back on the road right away while we work with their insurer to get the vehicle repaired and back to them. The quickest way to get your car back on the road is to contact Marney or Brad and let us streamline the repair process.

Recently we have been updating and adding to our "FREE" Courtesy Car fleet. At Brads we guarantee to have a courtesy car available to all our Insurance clients

during the course of their vehicle repairs. We have added a 2009 Suzuki Swift to our fleet as our newest courtesy vehicle. When a customer needs their vehicle repaired and can't be without it, we will keep them on the road in one of our clean, reliable, "free" courtesy cars.

In this fast-paced world we understand that our customer's time is precious, that's why we offer an Online Quote Service. Once an accident has happened, or there is previous damage needing repair, visit our website and fill in the online form including an upload photo feature for instant visual communication and an immediate quoting facility.

criteria apply).

FACILITIES & EQUIPMENT

Our full Downdraft GL1000 Spray & Bake Booth ensures your vehicle's paint is applied, cured & surgically cleaned during the full application process reproducing a factory-quality finish.

We are a BASF Glasurit Certified Refinish Warranty Center. This means that our paint refinishes are backed by BASF throughout New Zealand. Glasurit Automotive paint products are lifetime warranted & guaranteed and the refinish warranty takes effect as soon as we return the vehicle. The paint we use has superior flow, gloss and build, a more durable finish, superior color matching, improved drying & polishing behaviour, is environmentally friendly and is recommended by most car manufacturers.

This Cebora Motor Industry Bodyshop Approved Inverter Spot Welder Station with 14,000Amps Welding Power and a clamping force of 610 daN meets all car manufacturers requirements. The use of this welder means we can restore your vehicle back to its exact strength and factory-welded specifications.

At Brads we have an AutoRobot chassis alignment system which is a fast, jiggging bed system supporting your vehicle entirely throughout the repair and alignment process. Coupled with the AutoRobot 3D satellite measuring system, your car is returned to original condition and tolerance to within a millimetre of the factory specifications.

Our Facilities Include:

- Luxurious Customer reception
- Glasurit 'Spot repair paint system'
- Rupes dustless sanding system
- Full Autorobot Chassis alignment system from Finland
- Full 3D Satellite body measuring system from Finland
- Wurth body sealers & rust preventers from Germany
- Full Downdraft imported spray and heated curing paint booth
- Total Glasurit paint system & computer colour mixing software

STAFF & ACCREDITATION

Brads has been selected by Vero to become an Approved Repairer. We are very proud of this achievement. To be considered a Vero Approved Repairer, we have had to meet very strict criteria and we have had to be able to demonstrate that our work is consistently of a high standard, that we employ skilled staff, we are customer service focused and we also have sound business practices.

We undertake work for all Insurance companies and are members of the Collision Repair Association and although some insurers have their own "aligned repairer" network and may direct you to choose from one of them, it "IS" still "YOUR" choice and you are entitled to have your vehicle repaired by your own nominated repairer

Brad's Personal Background:

Having been an NZMBBA qualified A-Grade panelbeater since 1986 and successful Panelshop founder and owner in Nelson for 10 years, I became exposed to and active in motor racing here in New Zealand. Realizing a desire to pursue this new interest professionally, I sold my company in 1998 to take up an offer working in Las Vegas, building Shelby Cobras. I then went on to work for an Australian V8 Supercar Team, Wade Henshaw, Mike Pero, Jeff Judd and Peter Brock. That 6 years of experience gained has provided a greater knowledge and understanding of motor vehicles design, strength and requirement for thorough and accurate repairs to ensure that the maximum integrity and performance is reinstated following accident damage.

My experience, skills and knowledge are brought together now in establishing our purpose-designed repair facility, which is structured on fast, efficient and qualified vehicle repair and rectification.
